

Vampire Fangs Instructions

Applying Fangs:

Practice placing teeth in mouth in front of a mirror without putty. Rinse each denture with soapy, warm water and dry well. Brush teeth and dry with a paper towel.

Custom Fit Instructions:

Read all instructions before starting. Once it has been mixed, putty starts an irreversible action and quickly sets. Practice placing dentures on your teeth in front of a mirror without putty. Rinse with soapy warm water and dry well. Brush teeth and dry with paper towel.

Custom Fit Instructions:

1. Divide the putty in each bag into two equal portions. One portion from each bag for each denture.
2. Put aside one portion from each bag.
3. With your fingertips, mix together one portion from each bag until putty has uniform color. This will take less than one minute.
4. Fill one fang with putty to overflowing. Be sure some putty seeps through the hole in the fang.
5. Center your incisor tooth in the putty and push the fang upward.
6. Hold in place for 3 to 5 minutes.
7. Gently remove with a downward wiggling motion.
8. Repeat the procedure for the other fang. Remember, teeth are for disguise only. Never use them to bite.

Dental Putty:

Base-Silicone oxides, organopolysilicones, paraffin, pigment (metal oxides).

Catalyst-Silicone oxides, organopolysilicones, paraffin, pigment (metal oxides), platinum catalyst.
